FOOD ASSISTANCE FACT SHEET BANGLADESH

Updated September 30, 2018

SITUATION

- Attacks by armed actors on Burmese security posts in August 2017 and subsequent military operations in Rakhine state, home to the majority of Rohingya Muslims in [Burma](#), has caused a major humanitarian crisis in neighboring Bangladesh. The violence in Burma has forced more than 725,000 Rohingya refugees to flee to southeastern Bangladesh, joining more than 212,000 Rohingya living in the country prior to August 2017, the UN reports.
- Most of these refugees reside in temporary settlements near Cox's Bazar, where they suffer from high levels of food insecurity and malnutrition. The concentration of refugees in southeastern Bangladesh is the highest in the world, and the host communities are largely impacted by the influx, the UN reports.
- Recurring natural disasters, such as floods and cyclones, continue to exacerbate poverty-related issues, including food insecurity and malnutrition in many parts of the country. While levels of extreme poverty are in decline, approximately 31 percent of Bangladeshis still live below the national poverty line, according to the UN World Food Program (WFP). Approximately 25 percent of the population in Bangladesh remains food insecure and 36 percent of children younger than 5 years of age suffer from stunting—or chronic malnutrition—WFP reports.

RESPONSE

- USAID's Office of Food for Peace (FFP) partners with CARE International, Helen Keller International and World Vision to implement multi-year development programs to promote agriculture, livelihoods, maternal and child health, women's empowerment and disaster risk reduction (DRR) in multiple regions throughout the country. In FY 2018, FFP contributed more than \$44 million to these non-governmental organizations in support of their programs.
- In FY 2018, FFP contributed \$101.4 million to WFP to provide in-kind food aid and food vouchers to Rohingya refugees, as well as cash-based income-generating activities to host communities in Cox's Bazar. WFP assistance includes a nutritional component, where children under 5 years of age and pregnant and lactating women receive specialized foods to prevent and treat acute malnutrition. FFP also supports DRR activities through WFP to prepare for monsoon and cyclone seasons, as well as coordination support for the food security and logistics sectors.
- FFP also partners with the UN Children's Fund to provide ready-to-use therapeutic food to treat children younger than 5 years of age suffering from severe acute malnutrition, as well as a mix of complementary services, such as capacity building and nutrition sector coordination support.

FOOD FOR PEACE CONTRIBUTIONS

Total Contributions per Fiscal Year

	<i>US Dollars</i>	<i>Metric Tons*</i>
FY 2018	\$152.1 million	76,858 MT
FY 2017	\$55.4 million	77,231 MT
FY 2016	\$40.7 million	90,020 MT

*Metric tonnage does not reflect funding for vouchers or cash transfers.
